Muhammad Younus

Web Developer - Frontend & Full-Stack

Lahore, Pakistan | +92 301 7933040 | khokharunus782@gmail.com
github.com/younasahmad782 | younasahmad782.github.io/portfolio/ | linkedin.com/in/muhammad-younus-b658b6275

PROFILE

Practical web developer with hands-on experience building responsive websites, React applications, and full-stack business software. Shipped live projects including a full-stack business management platform, a single-product cash-on-delivery landing page, a multi-tool utility website, and a React dashboard with state management. Comfortable working independently and remotely - from planning and building to debugging, testing, and deployment. Seeking junior web developer roles, remote or based in Lahore.

SKILLS

Frontend

HTML5 | CSS3 | JavaScript (ES6+) | Responsive Design | DOM | Forms | Dynamic UI

Frameworks & Tools

React | Vite | TypeScript basics | Redux-style state | Git & GitHub | GitHub Pages | Vercel

Backend & CMS

Node.js | Express | PostgreSQL | Prisma ORM | REST APIs | Socket.IO basics | WordPress | On-page SEO

PROJECTS

BizFlow - Business Management Platform

GitHub: github.com/younasahmad782/BizFlow

- Full-stack business management system: sales and inventory tracking, supplier management, orders, generated PDF invoices, expenses, and profit & loss reports.
- AI assistant answering questions from real business data; full audit log of every action.
- React + TypeScript frontend, Node.js/Express + PostgreSQL backend, Socket.IO real-time updates; role-based access control and multi-tenant data isolation enforced server-side.
- Automated test suite (109 tests) and CI pipeline passing.

Noor Herbal Hair Oil - Single-Product COD Landing Page

Live demo: pk-cod-landing.vercel.app

- Built to a client brief for the Saudi market: mobile-first landing page with bundles, benefits, reviews, and a cash-on-delivery order form (name, mobile, city).
- Server-side order saving with CSV export; English/Arabic toggle with RTL layout; Next.js, React, and Tailwind CSS.

Everyday Calculator - Utility Web Application

Live: younasahmad782.github.io/everyday-calculator

- Built and deployed a multi-tool utility website: calculator, unit and currency converters, calendar/date tools.
- Fully responsive, mobile-friendly interface with SEO-conscious structure; deployed and maintained on GitHub Pages.

Blog Dashboard - React Application

- Blog listing and statistics dashboard with React: reusable components, custom hooks, and Redux-style state management for filtering and data display.
- Resolved real build, import/export, and state-configuration issues during development.

Clinic Website - Business Website

- Professional clinic website for Pakistani businesses: homepage, doctors, services, appointment section, and contact - responsive, SEO-friendly, business-focused.

Younus Sports Hub - E-commerce Concept

- E-commerce-style sports products interface: product listings, categories, login/signup UI, Pakistan-focused pricing.

EXPERIENCE

Web Development - Independent Projects 2024 - Present

- Design, build, test, and deploy websites and web applications using HTML, CSS, JavaScript, React, and WordPress.
- Apply on-page SEO, responsive layouts, and API integration; debug and improve projects through iterative testing.

Virtual Assistant - Self-Practice 2024 - Present

- Delivered remote support: data entry, organized Excel sheets, professional Word documents, and PowerPoint presentations; met deadlines working independently and remotely.

EDUCATION

DigiSkills 3.0, Batch-04 - Full Stack Development with MERN In progress

- Hands-on coursework in the MERN stack, including a working Product Inventory CRUD API (20 endpoints verified).

1-Year Computer Course - Government College University Faisalabad 2023 - 2024

- MS Office, C++ & OOP programming, web development (HTML, CSS, WordPress). Languages practiced: HTML, CSS, JavaScript, C++, TypeScript basics.

FSc Pre-Medical - Prime Science School 2019 - 2021

- Completed with A+ grade.
